Our Services

# 1 Reasons for a Dornbracht Shower

What are the distinguishing features of a Dornbracht shower? What makes them different and what makes them an excellent choice for the long-term? One thing is certain: With a Dornbracht shower, you are always choosing an extraordinary way to experience water.

Everything harmonized – from the sink to the shower – Dornbracht allows you to have a uniform design for all of the fittings throughout the bathroom. Consistency in shapes, handles, and cover plates creates a coherent look throughout the room.

Consistent  
Form  
Language

## Tone on Tone

Dornbracht offers you the option of uniform finishes for the products you choose, helping you create harmonious aesthetics throughout the entire bathroom. Choose from a variety of carefully curated finishes, ranging from timeless and classic colors, to expressive dark or elegant gold tones.

Our selection of finishes can be found on p. 68

# The Fascinating Shapes of Water

Much of our know-how flows into the development of innovative and effective spray types. In this way, we sculpt the element of water in a variety of ways – whether as a powerful waterfall, crystal-clear

laminar jet, or fine rain. A special highlight is Dornbracht rain: Its secret is voluminous drops that hit the skin as softly and fully as if they were falling from clouds.

## From Energizing to Relaxing

Dornbracht showers offer a wide range of spray types that are designed to meet different needs. While invigorating spray types add refreshing energy to

the morning shower ritual, gentle spray types create a relaxing atmosphere – for moments of peace and relaxation in your own wellness oasis.

Regular  
Regular flow rate

FlowReduce+  
Maximum reduction of flow rate with  
minimal effect on the shower experience (x-tra Service)

# FlowReduce – A Sustainable Approach

As a leading expert in water solutions, Dornbracht offers high-quality, resource-saving products with FlowReduce+ which are offered via x-tra Service, a department for individually customized production.

Water consumption is reduced to the maximum in these reduced flow products (up to 28% for hand showers), with the aim to save money and resources.

More about our sustainable  
shower solutions:  
[dornbracht.com/flowreduce-  
shower](https://dornbracht.com/flowreduce-shower)

# Invisible Perfection

With Dornbracht flush-mounted solutions, the installation of our fittings is uncomplicated, flexible, and completely invisible. Using the xGRID rail system, all elements are perfectly aligned horizontally and vertically behind the wall. This enables individual solutions to be implemented with perfection (even in difficult structural situations) for maximum design freedom and uncompromising esthetics.

xGRID for perfect alignment

Dornbracht flush-mounted products enable you to create and implement sophisticated design solutions quickly and easily.

# 3 Mix & Match – Customize Your Shower

Design your unique shower experience: Our modular system gives you an array of options when it comes to designing your bathroom. Many designs have matching elements, from handles and cover plates down to the washbasin itself, creating consistent and harmonious aesthetics in the bathroom. Some

products are designed in such a puristic way that available combination options are even more extensive. Here we differentiate between universal (suitable for all series/designs) and specific (suitable for specific series/designs, usually generic round and square). The design and features of our shower solutions can be customized in a variety of ways to suit your wishes and needs. Previous installations can be modified with other Dornbracht products or upgraded with additional modular components – let your creativity take charge.\*

\*Technical feasibility must be checked on a case-by-case basis.

## Rain panel

Experience wellness for body and soul in multi-sensory moments made possible by our rain panels. The square design gives you the choice of two different sizes and spray types, with optional light integration. Our round rain panels offer a conservative design that lets you experience an unending flow of water, or a sculptural design that adds an expressive touch to your bathroom.

The products shown here represent examples only. Scan the QR code for a complete overview.

# WATER MODULES

Dornbracht WATER MODULES make it easy to upgrade your bathroom to a private spa. They can be integrated into any shower system and will enrich your wellness and shower ritual once installed, giving you a daily boost to your health, vitality and well-being. The WATER MODULES we offer differ mainly in how they immerse you in

water. Choose our waterfall showers, which envelop the neck area in a gush of water, or our massage modules, which massage specific parts of the body with powerful sprays. The laminar stream of our Kneipp modules, which completely envelops the skin in water, makes soothing therapeutic showers quick and easy.

# Hand shower sets

Choose from numerous hose shower designs and find the perfect solution for your unique shower. The single-point mounting system is not only minimalist, but also saves space. The hose shower set with two attachment points lets the shower hose hang in a graceful and aesthetic way. Both variants are available as round or angular designs. You can also decide what functions you want your combined hand-held shower to have.

# Control elements

Depending on the individual configuration of your outlets, you will also need a control unit to manage water flow/temperature. Surface-mounted or flush-mounted? As a mixer or with thermostat function? One or more outlet points, controlled simultaneously or individually? Today there are many ways to regulate the flow of water in the shower.

# Shower Thermostats, Pressure balance valves, Concealed Thermostats

Our different control unit types offer numerous ways to control how the water flows. Depending on your individual design preferences, you can choose not only between round and square shapes in many product categories, but also configure your bathroom with design continuity in mind, for example with specific handles that reflect the design of your washbasin fitting.
