DESIGNED FOR WELLNESS
CONÇUE POUR LE BIEN-ÊTRE
DESIGNED FÜR WELLNESS
PROGETTATA PER IL BENESSERE

Anticipation builds for the shower that is the epitome of precision wellness, designed with uncompromising attention to the fine details that enhance life and please the senses.

On the Madison Avenue side, the building's mass is staggered, projecting further out from floor to floor. The sculpture garden, below street level between the pavement and the building, is traversed by a bridge protected by a concrete canopy. It can be accessed through a wall of glass that divides the sculpture garden into an outer and an inner area. The remainder of the cube is faced with grey granite and has only seven windows the outside world. One window (like the eye of Cyclops) is on the upper exhibition facing Madison Avenue, the remaining six appear to be arbitrarily scattered on the side that faces East 75th Street. The windows are set in frames that look almost as if they were carved off at an angle. On Madison Avenue the museum is set off from the street by a recessed stairway; firewalls made of exposed brick wall

The sculpture garden
Outdoor and indoor spaces interlock with the many different levels to create an exciting participatory environment.

WATER SAVING TECHNOLOGY

GRAFF's sensor mixers are expertly engineered with advanced technology for convenience and conservation. Water flows only when the sensor is activated, eliminating the waste of water that occurs when mixers are left running. Protecting earth's most precious resource while presenting a versatile minimalist design, GRAFF's sensor mixers set the course for a green future.

TECHNOLOGIE D'ÉCONOMIE D'EAU

Les robinets électroniques GRAFF sont conçus de manière experte avec une technologie de pointe pour la commodité et la conservation de l'eau. L'eau ne coule que lorsque le capteur est activé, éliminant ainsi le gaspillage d'eau qui se produit lorsque les robinets restent ouverts. Protégeant la ressource la plus précieuse de la planète tout en présentant un design minimaliste polyvalent, les robinets à capteur GRAFF ouvrent la voie à un avenir plus vert.

WASSERSPARTECH- NOLOGIE

Die elektronischen Armaturen von GRAFF wurden mit fortschrittlicher Technologie entwickelt, um den Komfort zu erhöhen und Wasser zu sparen. Das Wasser fließt nur dann, wenn der Sensor aktiviert ist, wodurch die Wasserverschwendung vermieden wird, die entsteht, wenn Wasserhähne laufen gelassen werden. Die Sensorarmaturen von GRAFF schützen die wertvollste Ressource der Erde und bieten gleichzeitig ein vielseitiges, minimalistisches Design, das den Weg in eine grüne Zukunft weist.

TECNOLOGIA DI RISPARMIO ACQUA

I rubinetti elettronici di GRAFF sono progettati con tecnologia avanzata per garantire praticità e risparmio. L'acqua scorre solo quando il sensore viene attivato, eliminando lo spreco d'acqua che si verifica quando i rubinetti vengono lasciati in funzione. Proteggendo la risorsa più preziosa della terra e presentando al contempo un design versatile e minimalista, i rubinetti a sensore GRAFF segnano la rotta per un futuro verde.

STRIKING STYLE

With an adaptable design by GRAFF's G+ Design Studio and precision engineering, the Harley Collection exudes modern elegance and confidence across a diverse selection of interiors.

Metallic finishes evoke the glint of chrome in the sun and the rich industrial heritage of copper, brass and steel. Alongside natural elements, a matte or black finish complements the abstract mineral veins of a marble wall.

Avec un design adaptable conçu par le studio de design G+ de GRAFF et une ingénierie de précision, la collection respire l'élégance moderne et l'assurance dans une sélection variée d'intérieurs.

Les finitions métalliques évoquent l'éclat du chrome au soleil et le riche héritage industriel du cuivre, du laiton et de l'acier. Aux côtés d'éléments naturels, une finition mate ou noire complète les veines minérales abstraites d'un mur en marbre.

Mit dem anpassungsfähigen Design des G+ Designstudios von GRAFF und präziser Technik strahlt die Kollektion moderne Eleganz und Selbstvertrauen in einer Vielzahl von Innenräumen aus.

Metallische Oberflächen erinnern an das Glitzern von Chrom in der Sonne und an das reiche industrielle Erbe von Kupfer, Messing und Stahl. In Verbindung mit natürlichen Elementen ergänzt eine matte oder schwarze Oberfläche die abstrakten Mineraladern einer Marmorwand.

Grazie al design adattabile del G+ Design Studio di GRAFF e all'ingegneria di precisione, la collezione emana eleganza moderna e sicurezza in una vasta gamma di interni.

Le finiture metalliche evocano il luccichio del cromo al sole e il ricco patrimonio industriale di rame, ottone e acciaio. Accanto agli elementi naturali, una finitura opaca o nera completa le venature minerali astratte di una parete di marmo.

MECHANISMS OF ELEGANCE

The Camden Collection's rounded, streamlined profile recalls the sleek European racing cars of the early 20th century. Camden's tapered handles follow the forms of race-car bodies, while levers recall their shifters, and cross handles suggest wheel spokes.

Mécanismes d'élégance

Le profil arrondi et aérodynamique de la collection Camden rappelle les élégantes voitures de course européennes du début du 20e siècle. Les poignées allongées de Camden reprennent les formes des carrosseries des voitures de course, tandis que les leviers rappellent les boîtes de vitesses et les poignées croisées les rayons des roues.

Mechanismen der Eleganz

Das abgerundete, stromlinienförmige Profil der Camden Kollektion erinnert an die schnittigen europäischen Rennwagen des frühen 20. Jahrhunderts. Die spitz zulaufenden Griffe von Camden sind den Formen der Rennwagenkarosserien nachempfunden, während die Hebel an die Schalthebel erinnern und die Kreuzgriffe an die Speichen der Räder.

Meccanismi di eleganza

Il profilo arrotondato e snello della Camden Collection ricorda le eleganti auto da corsa europee dei primi anni del XX secolo. Le maniglie allungate di Camden riprendono le forme delle carrozzerie delle auto da corsa, mentre le leve ricordano i loro cambi e le maniglie incrociate richiamano i raggi delle ruote.
