

WHAT WE DO:

RTI Systems (RTIS) specializes in High Definition Video Security/Surveillance and Live Video Broadcasting solutions.

Our system solutions are as varied as:

- ➔ Remote Monitoring Security/Surveillance using Video Analytics as a virtual guard.
- ➔ Live Video Broadcasting with unlimited concurrent viewers from our desktop, web, video wall, tablet or smart phone apps.
- ➔ Enterprise-grade Security/Surveillance with Video Analytics for any number of netOptic cameras – at one location, or spread over multiple cities, states, provinces or countries.
- ➔ Visual Project Management to enhance existing management tools.
- ➔ Quality Assurance Video Analytics to support Corporate SOP, Health & Safety, and OSHA guidelines.

WHERE WE DO IT:

We are global vision leaders with local insight and expertise in high-end market sectors as varied as:

- ➔ Construction
- ➔ Mixed Use Residential
- ➔ Retail/Commercial
- ➔ Hospitality

INSIDE

- ➔ Remote Monitoring Security/Surveillance
- ➔ Live Video Broadcasting
- ➔ Best Practices
- ➔ Why you should contract RTI Systems

24/7 SECURITY/SURVEILLANCE:

Choosing a firm to protect your project, facility or property, is a very important decision. As the most technologically advanced company in the industry, RTIS makes your decision easier.

Our state-of-the-art:

- 24/7 Remote Monitoring Response
- High Definition netOptic cameras with day/night mode, optional License Plate Recognition, and Facial Recognition
- Intelligent Video Analytics
- Digital Annunciators & Strobes
- The industry's highest frame rates

all translate directly to improved security and safety of the project, reduced liabilities, risks and costs, and increased bottom line margins.

RTIS integrates multiple systems to provide you with seamless safe, secure, and highly effective 24/7 Security/Surveillance.

WHAT MAKES OUR SYSTEMS SO EFFECTIVE

24/7 LIVE STEAMING VIDEO BROADCASTING:

RTIS opens up new frontiers for improving your site management through our High Definition Live Video Broadcasting solution. Our state-of-the-art HD megapixel netOptic cameras and internet technology translate directly to effective visual Site and Executive project management.

With RTIS, Live Video Broadcasting your projects can be viewed in “real-time” from our desktop, web, video wall, tablet or smart phone apps.

Hotel (10 stories)

High-Rise (42 stories)

Our various VIVO apps are loaded with exceptional features, all secured from our world-class data centers.

Live Video Broadcasting delivers the following outstanding features:

- The industry's highest frame rate with up to 30 frames per second from each netOptic camera.
- The industry's highest image quality resolution.
- Live Video means “live and in real-time” with unlimited simultaneous authorized viewers, with no loss of image quality or frame rate.
- No system software plugins required (*a vast departure from traditional industry practice where additional software plugins are the norm*).
- Image delivery shared across an unlimited number of projects - at one location or distributed over multiple cities, states, provinces or countries.
- Video feeds can be seamlessly integrated within your corporate website.
