

The Teknowledgies Advantage: Virtualized Finance and Accounting

Teknowledgies is a boutique finance and accounting firm with a unique value proposition: We utilize the most appropriate and cost-effective resources to get the work done: no more, no less. For example, we won't use a CFO-level resource to do your day-to-day accounting. That would be waste of *your* money. And our way is much more accurate, as our specialists can do the job better.

Conversely, if the situation requires CFO services, such as presenting a financial model to investors, or discussing financials with the board, then by all means, the CFO-level resource is used! Maximum efficiency and efficacy!

Our rates, especially when you factor in the workload balancing efficiencies, are the best in the Bay Area.

We offer a free half-hour consultation and a money-back guarantee for our services. No other firm can match this!

A few of our clients. Find the unicorns!

An Endorsement (just one of many)

"Teknowledgies was the best service ever for us. From a tiny startup through our rapid growth, TKi was there, adapting to our accounting and system needs in perfect sync and at the best possible price."

- Kolja Reiss, CEO at Dimoco
